

## Datasheet: OBT2003

<b>Description:</b>	MOUSE ANTI KINETOPLASTID MEMBRANE PROTEIN 11
<b>Specificity:</b>	KINETOPLASTID MEMBRANE PROTEIN 11
<b>Other names:</b>	KMP-11
<b>Format:</b>	Ascites
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	L-157
<b>Isotype:</b>	IgG1
<b>Quantity:</b>	0.5 ml

## Product Details

**RRID** AB\_619092

**Applications** This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			1/2000
Immunofluorescence	▪			1/500 - 1/1000
Immunoblotting	▪			1/1000 - 1/3000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

**Target Species** Protozoan

**Product Form** Ascites - lyophilised

**Reconstitution** Reconstitute with 0.5 ml distilled water  
Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution.

**Preservative Stabilisers** None present

**Immunogen** *L. donovani* lipophosphoglycan semi purified from epimastigotes.

**External Database Links**  
**UniProt:**  
[Q36736](https://www.uniprot.org/entry/Q36736)    [Related reagents](#)

**Fusion Partners** Spleen cells from immunised BALB/c mice were fused with cells of the SP2/0 myeloma cell line.

**Specificity** **Mouse anti Kinetoplastid Membrane Protein 11 antibody, clone L-157** recognizes Kinetoplastid Membrane Protein-11 (KMP-11), previously known as the lipophosphoglycan-associated protein (LPGAP), a 92 amino acid ~11 kDa membrane protein. Mouse anti Kinetoplastid Membrane Protein 11 antibody, clone L-157 was originally derived against *Leishmania donovani* lipophosphoglycan, but found to recognize the tightly associated LPGAP. KMP-11 is found in a wide variety of Kinetoplastid parasites including African trypanosomes, *Leishmania* and *Crithidia* ([Tolson et al. 1994](#)).

**Storage** Prior to reconstitution store at +4°C.  
After reconstitution store at -20°C.  
Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

**Guarantee** 12 months from date of reconstitution.
