

Datasheet: PAP002

BATCH NUMBER 155963

Description:	RECOMBINANT CHICKEN INTERLEUKIN-1 BETA
Name:	IL-1 BETA
Format:	Rec. Protein
Product Type:	Recombinant Protein
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA			▪	
Functional Assays	▪			
In vitro Assay	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Chicken
Product Form	Purified His-tagged recombinant protein expressed in <i>E.coli</i> - liquid
Preparation	Recombinant protein prepared from <i>E.coli</i>
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Approx. Protein Concentrations	250 ug/ml
External Database Links	UniProt: O73909 Related reagents

Product Information **Recombinant Chicken interleukin-1 (IL-1)** is a pro-inflammatory cytokine secreted by

many different cell types acting on a wide range of target cells, resulting in a diverse range of effects. The biological properties of IL-1 include the induction of B cell proliferation, stimulation of T cell proliferation in conjunction with IL-2 and the production of collagenase and prostaglandin by fibroblasts. IL-1 is also responsible for triggering the acute-phase response in the liver, and is involved in both cytokine network and vascular endothelium activation. Recombinant Chicken interleukin-1 (**PAP002**) induces corticosterone secretion *in vivo* ([Weining et al. 1992](#)).

Recombinant Chicken interleukin-1 (**PAP002**) was the immunogen used to produce Bio-Rad chicken IL-1beta antibody ([AHP941Z](#)).

Protein Molecular Weight	approximately 23kD
---------------------------------	--------------------

Purity	>85% by Ni chelate Chromatography
---------------	-----------------------------------
