

Datasheet: PBP034

**BATCH NUMBER 158143**

<b>Description:</b>	RECOMBINANT BOVINE INSULIN-LIKE GROWTH FACTOR I
<b>Name:</b>	IGF-I
<b>Other names:</b>	SOMATOMEDIN C
<b>Format:</b>	Rec. Protein
<b>Product Type:</b>	Recombinant Protein
<b>Quantity:</b>	5 µg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Bovine
<b>Product Form</b>	Purified recombinant protein - lyophilized
<b>Reconstitution</b>	Reconstitute with 20 µl sterile PBS containing 0.1% carrier protein Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution.
<b>Preparation</b>	Recombinant protein expressed in <i>Pichia pastoris</i> and purified by ion-exchange chromatography
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	10% Trehalose
<b>External Database Links</b>	<b>UniProt:</b>

**Entrez Gene:**

---

**Product Information**   **Recombinant Bovine insulin-like growth factor I (IGF-I)** is a recombinant protein corresponding to aa 50-119 of native bovine IGF-I.

IGF-I is a secreted mitogenic polypeptide and member of the insulin gene family, produced primarily by the liver, which effects a wide range of cells and plays a key role in cell proliferation and growth, inhibition of apoptosis, and is linked with tumor cell growth.

IGF-I signals by binding to the type 1 insulin-like growth factor receptor (IGF-IR) and also to the insulin receptor (IR), resulting in the activation of the AKT signaling pathway. IGF-I production is stimulated by growth hormone (GH) and can be hindered by GH insensitivity, deficiency in GH receptors or a malfunction in the post GH receptor signalling pathway.

---

**Protein Molecular Weight**   7.6 kDa

---

**Purity**   >95% by SDS PAGE analysis

---

**ELISA**   This reagent may be used as a standard in a sandwich ELISA assay in conjunction with [AHP2372](#) as a coating antibody and [AHP2372B](#) as a detection antibody.

---

**Storage**   Prior to reconstitution store at -20°C.  
After reconstitution store at -20°C.  
Storage in frost-free freezers is not recommended. This product should be stored undiluted.

---

**Guarantee**   12 months from date of despatch

---

**Health And Safety Information**   Material Safety Datasheet documentation #10591 available at: <https://www.bio-rad-antibodies.com/SDS/PBP034>  
10591

---

**Regulatory**   For research purposes only
