

Datasheet: PEP006

**BATCH NUMBER 160579**

<b>Description:</b>	RECOMBINANT HORSE SERUM AMYLOID A
<b>Name:</b>	SERUM AMYLOID A
<b>Other names:</b>	SAA
<b>Format:</b>	Rec. Protein
<b>Product Type:</b>	Recombinant Protein
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Horse
<b>Product Form</b>	Purified recombinant protein - lyophilized
<b>Reconstitution</b>	Reconstitute with 1.0 ml distilled water. Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution.
<b>Preparation</b>	Purified by affinity and reversed-phase chromatography
<b>Preservative Stabilisers</b>	None present
<b>Approx. Protein Concentrations</b>	0.1 mg/ml after reconstitution
<b>External Database Links</b>	<b>UniProt:</b>

**Product Information**   **Recombinant Horse serum amyloid A (SAA)** is a recombinant protein consisting of 120 amino acids, which includes a proprietary 10 aa tag at the N-terminus. An *Escherichia coli* expression system was used.

Serum amyloid A proteins are a family of acute phase proteins, produced primarily by the liver, highly conserved in vertebrate species, and used as markers of inflammation.

Equine SAA, as with serum amyloid A in other species, is present in different isoforms; this recombinant protein corresponds to isoform 1 (SAA1). Equine SAA is composed of 110 amino acids and differs from human SAA by having an 8 aa sequence insert in the central region of the sequence.

With similar biochemical properties to the native equine SAA, this reagent may be used as a standard in immunoassays for measurement of levels of horse serum amyloid A.

---

**Protein Molecular Weight**            13.6 kDa

---

**Purity**                            >95%

---

**Storage**                        Prior to reconstitution store at -20°C.  
After reconstitution store at -20°C.  
Storage in frost-free freezers is not recommended. This product should be stored undiluted.

---

**Guarantee**                      Guaranteed until date of expiry. Please see product label.

---

**Health And Safety Information**    Material Safety Datasheet documentation #10268 available at:
