

## Datasheet: PFP003 BATCH NUMBER 166141

| Description:  | RECOMBINANT CAT SERUM AMYLOID A |
|---------------|---------------------------------|
| Name:         | SERUM AMYLOID A                 |
| Other names:  | SAA                             |
| Format:       | Rec. Protein                    |
| Product Type: | Recombinant Protein             |
| Quantity:     | 0.1 mg                          |

## **Product Details**

| Applications                      | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u> |              |            |                |                    |  |  |  |

|                                   | ELISA  | Yes          | No         | Not Determined | Suggested Dilution |  |  |  |
|                                   | Functional Assays  | -            |            | •              |                    |  |  |  |
|                                   | Where this product has not been tested for use in a particular technique this does not<br>necessarily exclude its use in such procedures. Suggested working dilutions are given a<br>a guide only. It is recommended that the user titrates the product for use in their own<br>system using appropriate negative/positive controls.                 |              |            |                |                    |  |  |  |
|                                   |  |              |            |                |                    |  |  |  |

| Product Inform  | nation     | <ul> <li>Recombinant Cat serum amyloid A (SAA) is a 121 aa recombinant protein produced in <i>E.coli</i>, which includes a proprietary 10 aa tag at the N-terminus.</li> <li>Serum amyloid A proteins are a family of acute phase proteins, produced primarily by the liver, highly conserved in vertebrate species, and used as markers of inflammation.</li> <li>Feline SAA, as with serum amyloid A in other species, is present in different isoforms, this recombinant protein corresponds to isoform 1 (SAA1). Feline SAA is composed of 111 amino acids and differs from human SAA by having an 8 aa sequence insert in the central region of the sequence.</li> </ul> |   |           |  |  |  |
