

Datasheet: PFP003

BATCH NUMBER 166740

| | |
|----------------------|---------------------------------|
| Description: | RECOMBINANT CAT SERUM AMYLOID A |
| Name: | SERUM AMYLOID A |
| Other names: | SAA |
| Format: | Rec. Protein |
| Product Type: | Recombinant Protein |
| Quantity: | 0.1 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|-------------------|-----|----|----------------|--------------------|
| ELISA | ■ | | | |
| Functional Assays | | | ■ | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| | |
|---------------------------------------|---|
| Target Species | Cat |
| Product Form | Purified recombinant protein - lyophilized |
| Reconstitution | Reconstitute with 1.0 ml distilled water. Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. |
| Preparation | Purified by affinity and reversed-phase chromatography |
| Source | E.coli |
| Preservative Stabilisers | None present |
| Approx. Protein Concentrations | 0.1 mg/ml after reconstitution |

Product Information **Recombinant Cat serum amyloid A (SAA)** is a 121 aa recombinant protein produced in *E.coli*, which includes a proprietary 10 aa tag at the N-terminus.

Serum amyloid A proteins are a family of acute phase proteins, produced primarily by the liver, highly conserved in vertebrate species, and used as markers of inflammation.

Feline SAA, as with serum amyloid A in other species, is present in different isoforms, this recombinant protein corresponds to isoform 1 (SAA1). Feline SAA is composed of 111 amino acids and differs from human SAA by having an 8 aa sequence insert in the central region of the sequence.

With similar biochemical properties to the native feline SAA, this reagent may be used as a standard in immunoassays for measurement of levels of cat serum amyloid A.

Protein Molecular Weight 13.8 kDa

Purity >95%

Storage Prior to reconstitution store at -20°C.
After reconstitution store at -20°C.
Storage in frost-free freezers is not recommended. This product should be stored undiluted.

Guarantee Guaranteed until date of expiry. Please see product label.
