

Datasheet: PHP235 BATCH NUMBER 165589

Description:	RECOMBINANT HUMAN GM-CSF
Name:	GM-CSF
Other names:	GRANULOCYTE MACROPHAGE COLONY STIMULATING FACTOR
Format:	Rec. Protein
Product Type:	Recombinant Protein
Quantity:	20 µg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u>							
	rad-antibodies.com/protocols. Yes No Not Determined Suggested Dilution							
	ELISA	•			0.2 - 0.4ng/well			
	Western Blotting	-			1.5 - 3.0ng/lane			
	Functional Assays	•			1.0ng/ml			
	Where this product has	Where this product has not been tested for use in a particular technique this does not						
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.							
Target Species	Human							
Product Form	Purified recombinant protein - lyophilized							
Reconstitution	Reconstitute with 0.2 ml distilled water. Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. For extended storage, the addition of 0.1% bovine serum albumin (BSA) is recommended.							
Preparation	Purified recombinant GM-CSF expressed in <i>E. coli</i>							
Source	E.coli							
Preservative Stabilisers	10mM Sodium citrate p⊦	13.5						
Carrier Free	Yes							

Endotoxin Level	< 1.0 EU/ug
Approx. Protein Concentrations	0.1 mg/ml after reconstitution
External Database Links	UniProt: <u>P04141</u> <u>Related reagents</u> Entrez Gene: <u>1437</u> CSF2 <u>Related reagents</u>
Synonyms	GMCSF
Product Information	Recombinant Human granulocyte-macrophage colony stimulating factor is a highly purified preparation of <i>E. coli</i> produced human GM-CSF.
	GM-CSF (granulocyte-macrophage colony-stimulating factor) is a haematopoietic growth factor which exists in both glycosylated and non-glycosylated biologically active forms, and stimulates the development of granulocytes, macrophages, early megakaryocytes and eosinophil progenitor cells. The ability of recombinant GM-CSF to increase haematopoietic cell recovery has become a focus area in the therapeutic treatment of patients following bone marrow transplantation.
Protein Molecular Weight	14.6 kDa (128 amino acid residues)
Activity	The ED ₅₀ as determined by the dose-dependent stimulation of the proliferation of human TF-1 cells is ≤ 0.1 ng/ml, corresponding to a specific activity of $\geq 1 \times 10^7$ units/mg.
Purity	>98% by SDS PAGE/HPLC

Storage	Prior to reconstitution	n store at -20ºC.						
	This product should b							
	Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the protein. Should this product contain a precipitate we recommend microcentrifugation before use.							
Guarantee	Guaranteed for 3 months from the date of reconstitution or until the date of expiry, whichever comes first. Please see label for expiry date.
