Product Information Recombinant Human interleukin-11

Interleukin-11 (IL-11), also known as AGIF belongs to the IL-6 family of cytokines, and plays a protective role in acute inflammatory settings ([Traber *et al.* 2019](#)). IL-11 has both pro- and anti-inflammatory functions through activation of signaling cascades ([Lokau *et al.* 2017](#)). IL-11 is largely absent in the body fluids of healthy people, but is upregulated in a series of diseases. IL-11 can be expressed in fibroblasts, and its inhibition has been suggested as a treatment for fibrotic disease ([Schafer *et al.* 2017](#)), including fibrotic cardiovascular diseases ([Ye *et al.* 2019](#)). A role of IL-11 has also been identified in development of inflammation-associated cancers, and its inhibition may be a therapeutic goal ([Putoczki *et al.* 2013](#)).

This recombinant Human interleukin-11 can be used to create a standard curve in a sandwich ELISA with purified Mouse anti Human interleukin-11 antibody, clone D08-4C12 ([MCA6204GA](#)) as a capture antibody and biotinylated Mouse anti Human interleukin-11 antibody, clone C16-4B8 ([MCA6205B](#)) as the detection antibody.

Storage Prior to reconstitution store at -70°C. Following reconstitution store at -80°C.

This product should be stored undiluted.

Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the protein. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee Guaranteed for 3 months from the date of reconstitution or until the date of expiry, whichever comes first. Please see label for expiry date.
