

## Datasheet: PMP35 BATCH NUMBER 161843

| Description:  | RECOMBINANT MOUSE MCP-1 |  |  |
|---------------|-------------------------|--|--|
| Name:         | MCP-1                   |  |  |
| Other names:  | CCL2                    |  |  |
| Format:       | Rec. Protein            |  |  |
| Product Type: | Recombinant Protein     |  |  |
| Quantity:     | 10 μg                   |  |  |

## **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="https://www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

|                   | Yes | No | Not Determined | Suggested Dilution |
|-------------------|-----|----|----------------|--------------------|
| ELISA             | •   |    |                | 0.2 - 0.4ng/well   |
| Western Blotting  |     |    |                | 1.5 - 3.0ng/lane   |
| Functional Assays | •   |    |                | 1.0 - 20ng/ml      |

Where this protein has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the protein for use in their own system using appropriate positive/negative controls.

| Target Species              | Mouse  |
|-----------------------------|--|
| Product Form                | Purified recombinant protein - lyophilized   |
| Reconstitution              | Reconstitute with 0.1ml distilled water  Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. |
| Preparation                 | Recombinant protein prepared from <i>E. coli</i> .   |
| Preservative<br>Stabilisers | None present   |
| Carrier Free                | Yes  |
| Endotoxin Level             | < 0.1 ng/ug  |

| Approx. Protein Concentrations   | 0.1mg/ml after reconstitution  |
|----------------------------------|--|
| External Database<br>Links       | UniProt: P10148 Related reagents  Entrez Gene: 20296 Ccl2 Related reagents   |
| Synonyms                         | Je, Mcp1, Scya2  |
| Product Information              | <b>Recombinant mouse MCP-1</b> is 13.8 kDa peptide corresponding to full-length mature mouse monocyte chemotactic protein 1. MCP-1, otherwise known as CCL2 or JE, is a secreted chemokine involved in the recruitment of monocytes to sites of injury or inflammation ( <u>Lu, B. et al., 1998</u> ).     |
| Protein Molecular<br>Weight      | 13.8kD (125 amino acid sequence)   |
| Purity                           | >98% by SDS PAGE and HPLC analysis   |
| ELISA                            | This product may be used as a standard for ELISA applications with our <u>purified mouse MCP-1 antibody</u> (AAM43).   |
| References                       | 1. Ren, Z. <i>et al.</i> (2019) Minocycline attenuates ethanol-induced cell death and microglial activation in the developing spinal cord. <u>Alcohol. 79: 25-35.</u>  |
| Storage                          | Prior to reconstitution store at -20°C. Following reconstitution store at -20°C.  This product should be stored undiluted  Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the protein. Should this product contain a precipitate we recommend |
|                                  | microcentrifugation before use.  |
| Guarantee                        | Guaranteed for 3 months from the date of reconstitution or until the date of expiry, whichever comes first. Please see label for expiry date.  |
