Datasheet: PMP67 BATCH NUMBER 155361

Description:	RECOMBINANT MOUSE VEGF
Name:	VEGF
Other names:	VPF
Format:	Rec. Protein
Product Type:	Recombinant Protein
Quantity:	10 µg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u>							
	rad-antibodies.com/protocols.							
		Yes	No	Not Determined	Suggested Dilution			
		•			0.2 - 0.4ng/well			
	Western Blotting	•			1.5 - 3.0ng/lane			
	Functional Assays	•			1.0ng/ml - 5.0ng/ml			
	Where this product has not been tested for use in a particular technique this does not							
	necessarily exclude its u	se in such	n procedu	res. Suggested working	g dilutions are given as			
	a guide only. It is recomr system using appropriate			•	or use in their own			
Target Species	Mouse							
Product Form	Purified Recombinant Protein - lyophilized							
Reconstitution	Reconstitute with 0.1 ml protein may appear as a gently mixed after recons azide is recommended. N.B. For functional studie	film at the stitution. F	e bottom o or long te	of the vial. Bio-Rad rec erm storage the additio	ommend that the vial is			
Preparation	Recombinant protein exp	pressed in	E. coli					
Buffer Solution	20mM Acetic Acid							
Preservative Stabilisers	None present							

Carrier Free	Yes	
Endotoxin Level	< 0.1 ng/ug	
Approx. Protein Concentrations	0.1 mg/ml after reconstitution

Synonyms	Vegf	
Product Information	Murine vascular endothelial growth factor (VEGF) is a homodimeric protein, where each subunit is 165 amino acids in length. Murine VEGF is expressed by various vascularized tissues and is reported to stimulate endothelial cell growth and angiogenesis.	
Protein Molecular Weight	39 kDa (homodimer of 165 amino acid sequence)	
Purity	>98% by SDS page and HPLC analysis	
ELISA	PMP67 may be used in ELISA applications with either <u>AAM51</u> or <u>AAM51B</u> .	
References	1. Avraham-Lubin, B.C. <i>et al.</i> (2012) VEGF induces neuroglial differentiation in bone marrow-derived stem cells and promotes microglia conversion following mobilization with GM-CSF. <u>Stem Cell Rev Rep. 8 (4): 1199-210.</u>	ı
Storage	Prior to reconstitution store at -20°C. Following reconstitution store at -20°C.	
	This product should be stored undiluted.	
	Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the protein. Should this product contain a precipitate we recommer microcentrifugation before use.	
Guarantee	Guaranteed for 3 months from the date of reconstitution or until the date of expiry, whichever comes first. Please see label for expiry date.	
Health And Safety Information	Material Safety Datasheet documentation #10527 available at: https://www.bio-rad-antibodies.com/SDS/PMP67 10527	
Regulatory	For research purposes only
