

Datasheet: PPP023

BATCH NUMBER 161242

Description:	RECOMBINANT PIG INTERLEUKIN-6
Name:	IL-6
Format:	Rec. Protein
Product Type:	Recombinant Protein
Quantity:	5 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Pig
Product Form	Purified recombinant protein - lyophilized
Reconstitution	Reconstitute with 20 µl sterile PBS containing 0.1% carrier protein Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution.
Preparation	Recombinant protein expressed in <i>Pichia pastoris</i> and purified by ion-exchange chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	10% Trehalose
External Database Links	UniProt: P26893 Related reagents

Product Information **Recombinant Pig interleukin-6 (IL-6)** is a recombinant protein corresponding to aa 29-212 of native porcine IL-6.

Porcine interleukin-6 is a multifunctional cytokine secreted by a range of cell types, in particular T cells and macrophages. IL-6 has a range of activities and includes the differentiation of B cells into Ig producing cells, differentiation of lymphocytes and of monocytes. IL-6 functions in both a pro-inflammatory role where it is an important inducer of the acute phase response and also as an anti-inflammatory myokine.

Interleukin-6 induces myeloma growth and is an essential cytokine required for successful hybridoma growth.

Protein Molecular Weight	20.9 kDa
---------------------------------	----------

Purity	>95% by SDS PAGE
---------------	------------------

ELISA	This reagent may be used as a standard in a sandwich ELISA assay in conjunction with AHP2391 as a coating antibody and AHP2391B as a detection antibody.
--------------	--

Storage	Prior to reconstitution store at -20°C. After reconstitution store at -20°C. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the protein.
----------------	--

Guarantee	12 months from date of despatch
------------------	---------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10591 available at: https://www.bio-rad-antibodies.com/SDS/PPP023 10591
--------------------------------------	---

Regulatory	For research purposes only
