

Datasheet: PRP07A

BATCH NUMBER 154191

Description:	RAT IgE KAPPA
Name:	IgE KAPPA
Format:	Purified
Product Type:	Purified Protein
Clone:	IR162
Isotype:	IgE
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			0.1ug/ml - 1.25ug/ml

Where this protein has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the protein for use in their own system using appropriate positive/negative controls.

Target Species	Rat
Product Form	IgE purified (myeloma IR162) - liquid
Preparation	Purified IgE prepared by affinity chromatography from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.1% Sodium Azide
Approx. Protein Concentrations	IgE concentration 1.0 mg/ml
External Database Links	UniProt: P01855 Related reagents

Entrez Gene:

RRID	AB_482877
-------------	-----------

Specificity	Rat IgE is generated by a spontaneous immunocytoma isolated from a LOU/Wsl rat (Bazin 1974 , Bazin & Beckers 1974). The determinant recognized by IgE clone IR162 appears to be shared by several helminthic parasites, including <i>Anisakis simplex</i> , <i>Clonorchis sinensis</i> and <i>Toxocara canis</i> (Cho et al. 2000).
--------------------	--

Purity	Single band by agarose eletrophoresis (5) and immunoelectrophoresis (6)
---------------	---
