

Datasheet: STAR104D650 BATCH NUMBER 152512

| Description: | GOAT F(ab')2 ANTI HAMSTER IgG:DyLight®650 | |
|---------------|-------------------------------------------|--|
| Specificity: | IgG | |
| Format: | DyLight®650 | |
| Product Type: | Polyclonal Antibody | |
| Isotype: | Polyclonal IgG | |
| Quantity: | 0.1 mg | |

Product Details

| Applications | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u> | | | | |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------|-------------------|------------------------------------|
| | | | | | |
| | rad-antibodies.com/protocols. | | | | |
| | Flow Outomotry | Yes | No | Not Determined | Suggested Dilution 1/50 - 1/200 |
| | Flow Cytometry | | | | |
| | | | | | 1/50 - 1/200 |
| | Where this antibody ha | | • | • | |
| | necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls. | | | | |
| Target Species | Hamster | | | | |
| Product Form | F(ab') ₂ fragment of purified IgG conjugated to DyLight [®] 650 - liquid | | | | |
| Max Ex/Em | Fluorophore | Excitation M | /lax (nm) | Emission Max (nm) | |
| | Dylight®650 | 654 | | 673 | |
| Antiserum Preparation | Antisera to hamster IgG were raised by repeated immunisation of goats with highly purified antigen. Purified IgG was prepared by affinity chromatography. | | | | |
| Buffer Solution | Phosphate buffered saline | | | | |
| Preservative Stabilisers | 0.09% Sodium Azide (NaN ₃) | | | | |
| Approx. Protein Concentrations | IgG concentration 1.0 mg/ml | | | | |

| Immunogen | Hamster IgG. | | | | | |
|---------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|
| Specificity | Goat F(ab')2 anti Hamster IgG antibody recognizes Golden Syrian and Armenian hamster IgG. Goat F(ab')2 anti Hamster IgG antibody has been adsorbed against both mouse and rat immunoglobulins to minimise cross-reactivity. | | | | | |
| Flow Cytometry | Use 50ul of the suggested working dilution to label 1×10^6 cells in 100ul | | | | | |

| Storage | This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. | | | | | |
| Guarantee | 12 months from date of despatch | | | | | |
