

Datasheet: STAR117D800GA BATCH NUMBER 151592

Description:	GOAT ANTI MOUSE IgG (H/L):DyLight®800 (MULTI SPECIES ADSORBED)
Specificity:	lgG (H/L)
Format:	DyLight®800
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .					
		Yes	No	Not Determined	Suggested Dilution	
	Flow Cytometry	•				
	Western Blotting	-			1/10000 - 1/50000	
	Immunofluorescence	-				
	Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using the appropriate negative/positive controls					
Target Species	Mouse					
Product Form	Purified IgG conjugated to DyLight [®] 800 - liquid					
Max Ex/Em	Fluorophore	Excitation Ma	ax (nm)	Emission Max (nm)		
	Dylight®800	777		794		
Preparation	Purified IgG prepared by affinity chromatography					
Antiserum Preparatio	n Antisera to mouse IgG purified antigen	were raised	by repea	ated immunisations of	goats with highly	
Buffer Solution	Phosphate buffered saline					
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)				

Approx. Protein Concentrations	IgG concen	tration 1.0mg/r	ml		
Immunogen	Whole mou

RRID	AB_108451	AB_10845157			
Specificity		/louse IgG ant nunoglobulin cla	tibody recognizes mouse IgG and light chains common to othe asses.		
	lapine and 0 0.1% cross	chicken immun reactivity was	been cross-adsorbed using human, bovine, porcine, equine, noabsorbants to remove cross-reactive antibodies. Less than detected to human, bovine, porcine, equine, caprine, lapine an ectrophoresis and ELISA.		

	Goat anti Mouse IgG antibody is highly recommended for use as a secondary antibody with human and veterinary samples. Goat anti Mouse IgG antibody has been used successfully as a secondary detection reagent in combination with mouse clone <u>CC327</u> for the detection of TNF α and mouse clone <u>8M6</u> for the detection of interleukin-8 in bovine respiritory syncitial virus infected, neonatal ovine lung tissue by immunohistochemistry (<u>Redondo <i>et al.</i> 2013</u>).
Flow Cytometry	Use 50 ul of the suggested working dilution to label 1×10^6 cells in 100ul

Storage	Store at +4°C or at -20°C if preferred.
	This product should be stored undiluted.
	Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
	Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use
Guarantee	12 months from date of despatch
