

Datasheet: STAR117D800GA

BATCH NUMBER 158102

Description:	GOAT ANTI MOUSE IgG (H/L):DyLight®800 (MULTI SPECIES ADSORBED)
Specificity:	IgG (H/L)
Format:	DyLight®800
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			
Western Blotting	•			1/10000 - 1/50000
Immunofluorescence	-			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using the appropriate negative/positive controls

Target Species	Mouse			
Product Form	Purified IgG conjugate	Purified IgG conjugated to DyLight [®] 800 - liquid		
Max Ex/Em	Fluorophore	Excitation Max (nm)		n)
	Dylight®800	777	794	
Preparation	Purified IgG prepared by affinity chromatography			
Antiserum Preparatio	n Antisera to mouse IgG purified antigen	S were raised by repea	ated immunisations	s of goats with highly
Buffer Solution	Phosphate buffered sa	aline		
Preservative Stabilisers	0.09% Sodium Azide	(NaN ₃)		

Approx. Protein Concentrations

IgG concentration 1.0mg/ml

Immunogen

Whole mouse IgG

Specificity

Goat anti Mouse IgG antibody recognizes mouse IgG and light chains common to other mouse immunoglobulin classes.

Goat anti Mouse IgG has been cross-adsorbed using human, bovine, porcine, equine, lapine and chicken immunoabsorbants to remove cross-reactive antibodies. Less than 0.1% cross reactivity was detected to human, bovine, porcine, equine, caprine, lapine and chicken IgG by immunoelectrophoresis and ELISA.

Goat anti Mouse IgG antibody is highly recommended for use as a secondary antibody with human and veterinary samples. Goat anti Mouse IgG antibody has been used successfully as a secondary detection reagent in combination with mouse clone $\underline{CC327}$ for the detection of TNF α and mouse clone $\underline{8M6}$ for the detection of interleukin-8 in bovine respiritory syncitial virus infected, neonatal ovine lung tissue by immunohistochemistry (Redondo *et al.* 2013).

Flow Cytometry

Use 50 ul of the suggested working dilution to label 1x10⁶ cells in 100ul

Storage

Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use
