

Datasheet: STAR117F BATCH NUMBER 159615

Description:	GOAT ANTI MOUSE IgG (H/L):FITC (MULTI SPECIES ADSORBED)
Specificity:	IgG (H/L)
Format:	FITC
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.5 mg

Product Details

Applications	derived from testing wi communications from t information. For gener	ithin our labou the originator al protocol re	ratories, j s. Please	peer-reviewed publication in the publication of the	ndicated for further

Specificity	Goat anti Mouse IgG antibody recognizes mouse IgG and light chains common to oth mouse immunoglobulin classes.					
	lapine and 0.1% cross	chicken immur reactivity was	been cross-adsorbed using human, bovine, porcine, equine noabsorbants to remove cross-reactive antibodies. Less that detected to human, bovine, porcine, equine, caprine, lapine lectrophoresis and ELISA.			

Goat anti Mouse IgG antibody is highly recommended for use as a secondary antibody with human and veterinary samples. Goat anti Mouse IgG antibody has been used successfully as a secondary detection reagent in combination with mouse clone <u>CC327</u> for the detection of TNF α and mouse clone <u>8M6</u> for the detection of interleukin-8 in bovine respiritory syncitial virus infected, neonatal ovine lung tissue by immunohistochemistry (<u>Redondo *et al.* 2013</u>).

	(<u>Redolido et al. 2013</u>).
