

Datasheet: STAR161

BATCH NUMBER 167167

Description:	GOAT ANTI HUMAN IgG (Fd)
Specificity:	IgG (Fd)
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.5 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
-----------------------	-------

Product Form	Purified IgG - liquid
---------------------	-----------------------

Antiserum Preparation	Antisera to human IgG (Fd) were raised by repeated immunisation of goats with purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
------------------------------	--

Buffer Solution	Borate buffered saline
------------------------	------------------------

Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
---------------------------------	--

Approx. Protein Concentrations	IgG concentration 0.5mg/ml
---------------------------------------	----------------------------

Immunogen	Normal human IgG and human IgG paraproteins.
RRID	AB_10595780
Specificity	Goat anti Human IgG (Fd) antibody recognizes the Fd region of human IgG. The Fd region is approximately the first 220 amino acids from the N-terminus of the heavy chain, contained within the Fab' region. Goat anti Human IgG (Fd) antibody shows minimal cross-reactivity to the Fc region of human IgG and other human immunoglobulins.
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10077 available at: https://www.bio-rad-antibodies.com/SDS/STAR16110077
Regulatory	For research purposes only
