

Datasheet: STAR8D488GA

BATCH NUMBER 160943

Description:	RABBIT F(ab') ₂ ANTI MOUSE IgG:DyLight®488
Specificity:	IgG
Format:	DyLight®488
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat - 1/25
Immunofluorescence	▪			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls

Target Species

Mouse

Species Cross Reactivity

Reacts with: Rat

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG conjugated to DyLight®488 - liquid

Max Ex/Em

Fluorophore	Excitation Max (nm)	Emission Max (nm)
Dylight®488	493	518

Preparation

Purified IgG was prepared from whole serum by affinity chromatography. F(ab')₂ fragments were prepared by pepsin digestion of the IgG followed by a gel filtration step to remove any remaining intact IgG or Fc fragments

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers	0.09% Sodium Azide
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Whole mouse IgG.

Synonyms	Igh-4
RRID	AB_10844206
Specificity	<p>Rabbit F(ab')₂ anti Mouse IgG antibody recognizes all subclasses of mouse IgG. Cross reactivity with rat IgG is expected. Cross reactivity with human serum proteins has been minimised by solid phase adsorption.</p> <p>STAR8B is suitable as a bridge in a PAP / APAAP complex. Peroxidase anti-Peroxidase (PAP) complexes are formed by antibodies raised towards Horse Radish Peroxidase (HRP), binding to HRP molecules. Such complexes are used as signal amplification reagents in immunochemical staining techniques. It must be emphasised that the primary antibody must be raised in the same species as the antibodies used to form the PAP complex, so that a secondary "linker" antibody can be used to "bridge" the primary antibody to the PAP complex.</p>
Flow Cytometry	Use 50ul of the suggested working dilution to label 1x10 ⁶ cells in 100ul

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee 12 months from date of despatch
