

Datasheet: STAR9B

Description:	RABBIT F(ab')2 ANTI MOUSE IgG:FITC
Specificity:	lgG
Format:	FITC
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	1 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .					
		Yes	Νο	Not Determined	Suggested Dilution	
	Flow Cytometry	•			1/25 - 1/100	
	Where this antibody ha			•	•	
	necessarily exclude its use in such procedures. Suggested working dilutions are g a guide only. It is recommended that the user titrates the antibody for use in their system using appropriate negative/positive controls.					
Target Species	Mouse					
Species Cross Reactivity	Reacts with: Rat N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.					
Product Form	F(ab') ₂ fragment of IgG conjugated to Fluorescein Isothiocyanate Isomer I (FITC) - liquid					
Max Ex/Em	Fluorophore FITC	Excitation M 490	ax (nm)	Emission Max (nm) 525		
	FIIC	490		525		
Antiserum Preparatio		d IgG was p prepared by	repared fi / pepsin d	rom whole serum by a ligestion of the IgG fol	bbits with highly ffinity chromatography. lowed by a gel filtration	
Buffer Solution	Phosphate buffered saline					

Preservative Stabilisers	0.09% Sodium Azide						
Approx. Protein Concentrations	F(ab') ₂ concentration 1.0 mg/ml						
Immunogen	Purified mouse IgG.

Synonyms	lgh-4						
RRID	AB_321920						
Specificity	FITC conjugated Rabbit F(ab') ₂ anti Mouse IgG antibody recognizes all subclasses of mouse IgG.						
	Some cross reactivity with mouse IgM and IgA is expected, as is cross reactivity with rat IgG. Cross reactivity with human serum proteins has been minimised by solid phase adsorption.						
Flow Cytometry	Use 50ul of the suggested working dilution to label 10 ⁶ cells in 100ul.
