

Datasheet: TZA009P

**BATCH NUMBER 165711**

<b>Description:</b>	HUMAN ANTI INFLIXIMAB (DRUG/TARGET COMPLEX):HRP
<b>Specificity:</b>	INFLIXIMAB DRUG/TARGET COMPLEX
<b>Other names:</b>	Remicade
<b>Format:</b>	HRP
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	AbD18391
<b>Isotype:</b>	Fab antibody
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

### Product Form

A bivalent human recombinant Fab (lambda light chain) generated by coupling of the monovalent SpyTagged Fab [TZA009](#) with a HRP conjugated BiSpyCatcher version 2 ([TZC002P](#)). The coupled antibody has two DYKDDDDK tags and three His6-tags. It contains SpyTag3 peptide ([BLP086](#)) in 5-fold molar excess to block any unreacted Catcher sites. This antibody is supplied as a liquid.

### Preparation

Metal chelate affinity chromatography

### Source

E.coli

### Buffer Solution

Phosphate buffered saline

### Preservative Stabilisers

0.0095% MIT

### Approx. Protein

Antibody concentration 0.5 mg/ml

## Concentrations

---

**Immunogen**            Infiximab/TNF $\alpha$  complex

---

**Specificity**            **Human Anti-Infiximab (Drug/Target Complex) Antibody, clone AbD18391** specifically recognizes the antibody drug infiximab when in complex with its target, TNF $\alpha$  (cytokine “tumour necrosis factor-alpha”). At defined experimental levels, the antibody does not recognize free infiximab nor unbound recombinant human TNF $\alpha$ . However, as levels greatly increase, detection is noted. It can be used to measure levels of infiximab in patient samples.

This TrailBlazer Antibody is available in two different formats, monovalent Fab unconjugated (TZA009) and bivalent Fab conjugated to HRP (TZA009P). The monovalent recombinant Fab antibody has a SpyTag incorporated, which is used to create the bivalent format by coupling two SpyTagged Fab antibodies to an HRP conjugated BiSpyCatcher2 ([TZC002P](#)). Either format can be used to develop a pharmacokinetic (PK) antigen capture assay to measure free infiximab captured via immobilized TNF $\alpha$ .

The antibody is tagged with a SpyTag2 at the C-terminus of the Fab antibody heavy chain, enabling the user to couple it to any of the SpyCatchers available in our catalog for conversion to alternative formats in less than one hour.

[View a summary of all SpyCatcher products](#)

Infiximab (Remicade) is a chimeric IgG1/kappa antibody. It has been approved for the treatment of psoriasis, Crohn’s Disease, ankylosing spondylitis, psoriatic arthritis, rheumatoid arthritis and ulcerative colitis. Infiximab acts by blocking the binding of TNF $\alpha$  to TNF receptors. Infiximab also causes programmed cell death of TNF $\alpha$ -expressing activated T lymphocytes.

---

**Affinity**                The monovalent intrinsic affinity of AbD18391 was measured as  $K_D = 16$  nM by real time, label free molecular interaction analysis on immobilized biotinylated infiximab complexed with human TNF $\alpha$ .

---

**ELISA**                 Clone AbD18391pap can be used in a direct ELISA to detect the infiximab/TNF $\alpha$  complex or as the detection antibody for infiximab captured on immobilized TNF $\alpha$  in a PK antigen capture ELISA.

---

**Storage**                This product is shipped frozen.  
When ready to use, thaw and aliquot the sample as needed. Store aliquots at -70°C, if available, otherwise store at -20°C. It is not recommended to keep aliquots at 4°C for more than one week.

---

**Guarantee**            12 months from date of despatch

---

**Acknowledgements**    This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and

non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See [bio-rad.com/en-us/trademarks](https://www.bio-rad.com/en-us/trademarks) for details.
