

Datasheet: TZA0106

BATCH NUMBER 171363

Description:	HUMAN ANTI IXEKIZUMAB
Specificity:	IXEKIZUMAB
Other names:	Taltz
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	AbD60557
Isotype:	Fab antibody
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form

A monovalent human recombinant Fab (kappa light chain) selected from the HuCAL phage display library and expressed in a proprietary E. coli strain. The antibody is tagged with a DYKDDDDK tag, a SpyTag version 2 (VPTIVMVDAYKRYK) and a His6-tag (HHHHHH) at the C-terminus of the antibody heavy chain. This antibody is supplied as a liquid.

Preparation

Metal chelate affinity chromatography

Source

E.coli

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.0095% MIT

Approx. Protein

Antibody concentration 0.5 mg/ml

Concentrations

Immunogen Ixekizumab

Specificity **Human Anti-Ixekizumab Antibody, clone AbD60557** is a paratope specific, inhibitory, anti-idiotypic antibody (Type 1) that specifically recognizes the free human monoclonal antibody drug ixekizumab, and its biosimilar products. It does not recognize the drug target, human Interleukin 17 (IL-17A), nor ixekizumab in complex with IL-17A. This antibody can be used to measure free ixekizumab levels in serum from patients.

Clone AbD60557 is available as a monovalent Fab antibody incorporating a SpyTag at the C-terminus end of the antibody heavy chain for conversion by the end user into alternative formats using any of the [SpyCatchers](#) available in our catalog under product code [TZA0106](#). It is also available as a bivalent Fab antibody already conjugated to HRP via coupling to the HRP conjugated BiSpyCatcher2 ([TZC002P](#)) for use in direct ELISA under product code [TZA0106P](#).

A pair of anti-ixekizumab antibodies can be used to develop a pharmacokinetic (PK) bridging assay to measure free drug; clone AbD60557 is recommended as a detection antibody, paired with Human Anti-Ixekizumab Antibody, clone AbD60570ad ([TZA0105](#)) as the capture reagent.

Ixekizumab (trade name Taltz) is a humanized monoclonal antibody of the IgG4/kappa isotype that binds to interleukin 17 (IL-17A), a pro-inflammatory cytokine, and blocks its action. Blocking its effect is beneficial for use in inflammatory conditions. Ixekizumab is indicated for the treatment of moderate-to-severe plaque psoriasis and as a second-line therapy for active psoriatic arthritis.

Affinity The monovalent intrinsic affinity of Human anti-Ixekizumab Antibody, clone AbD60557ad was measured as $K_D = 0.1$ nM by real time, label-free molecular interaction analysis on immobilized ixekizumab.

ELISA Clone AbD60557ad can be used in indirect ELISA to detect ixekizumab. It can also be used as a detection antibody to develop a pharmacokinetic (PK) bridging ELISA for risankizumab, together with [TZA0105](#) as the capture reagent. Note that both [TZA0105](#) (capture) and [TZA0106](#) (detection) contain the same peptide tags. Therefore, using anti-tag antibodies for detecting [TZA0106](#) is not possible.

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee 12 months from date of despatch

Acknowledgements This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and

non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See [bio-rad.com/en-us/trademarks](https://www.bio-rad.com/en-us/trademarks) for details.
