

Datasheet: TZA0158GA

Description:	MOUSE ANTI HUMAN INTERLEUKIN-6
Specificity:	IL-6
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	rC01/1E8
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified recombinant IgG containing a SpyTag at the C-terminus of the antibody heavy chain – liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Source	CHO cells
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Recombinant IL-6 (Val 30-Met 212) expressed by <i>E.coli</i>

External Database Links	<p>UniProt: P05231 Related reagents</p> <p>Entrez Gene: 3569 IL6 Related reagents</p> <hr/> <p>Synonyms IFNB2</p> <hr/> <p>Specificity Mouse anti Human Interleukin-6 antibody, clone rC01/1E8, is a recombinant monoclonal antibody that recognizes Interleukin-6 (IL-6), also known as B cell stimulatory factor 2 (BSF2).</p> <p>IL-6 is a multifunctional cytokine composed of four alpha helices, containing various glycosylation sites and two disulfide bonds. It is expressed by numerous cell types including B lymphocytes, T lymphocytes, macrophages and dendritic cells. IL-6 secretion is stimulated during inflammation in response to tissue injury or infection. IL-6 signaling involves binding of IL-6 to either the membrane bound (classical pathway) or soluble (trans-signaling pathway) IL-6 receptor (IL-6R, CD126). IL-6/IL-6R further forms a complex with glycoprotein 130 (CD130), activating signal transduction, for example by the JAK/STAT3 pathway. IL-6 has diverse roles, including promoting B cell differentiation into plasma cells and stimulating IgG production, triggering the production of acute phase reactants by the liver, controlling lymphocyte trafficking and regulating differentiation of monocytes into macrophages.</p> <p>IL-6 dysregulation is involved in the pathogenesis of several autoimmune diseases. Therapeutic modulation of IL-6 has resulted in the approval of a number of treatments for autoimmune disorders such as rheumatoid arthritis, juvenile idiopathic arthritis and cytokine release syndrome.</p> <hr/> <p>Flow Cytometry Use 5µl of the suggested working dilution to label 0.5x10⁶ cells in 100µl. Best practices suggest a 5 min centrifugation at 6,000g prior to sample application.</p> <hr/> <p>Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p> <hr/> <p>Guarantee 12 months from date of despatch</p> <hr/> <p>Acknowledgements This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See bio-rad.com/en-us/trademarks for details.</p> <hr/> <p>Health And Safety Information Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/TZA0158GA</p>
