## Specificity

**Human anti rat IgG1 antibody, clone AbD41031** recognizes rat IgG1. No cross-reactivity is seen with other rat immunoglobulin subclasses.

The monovalent Fab format of this antibody (TZA036) is tagged with a SpyTag at the C-terminus of the Fab heavy chain, enabling the user to couple it to a [SpyCatcher reagent](#) for conversion to alternative formats in less than an hour.

Human anti rat IgG1, clone AbD41031 is also available as a bivalent Fab antibody already coupled to HRP (TZA036P).

## Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
