

Datasheet: TZA048

Description:	HUMAN ANTI OBINUTUZUMAB		
Specificity:	OBINUTUZUMAB		
Other names:	Gazyvaro		
Format:	Purified		
Product Type:	Monoclonal Antibody		
Clone:	AbD51167ad		
Isotype:	Fab antibody		
Quantity:	0.1 mg		

### **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
ELISA	•			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

## **Product Form**

A monovalent human recombinant Fab (kappa light chain) selected from Bio-Rad's human antibody phage display libraries expressed in a proprietary *E. coli.* strain. The antibody is tagged with a DYKDDDDK tag, a SpyTag version 2 (VPTIVMVDAYKRYK) and a His6-tag (HHHHHH) at the C-terminus of the antibody heavy chain. This antibody is supplied as a liquid.

Preparation	Metal chelate affinity chromatography	
Source	E.coli	
Buffer Solution	Phosphate buffered saline	
Preservative Stabilisers	0.0095% MIT	
Approx. Protein Concentrations	Antibody concentration 0.5 mg/ml

Obinutuzumab

#### **Specificity**

**Human Anti-Obinutuzumab Antibody, clone AbD51167ad** is a paratope specific, inhibitory, anti-idiotypic antibody (Type 1) that specifically recognizes the free human monoclonal antibody drug obinutuzumab, and its biosimilar products. It does not recognize the drug target, the B cell surface marker CD20, nor obinutuzumab in complex with CD20. This antibody can be used to measure free obinutuzumab levels in serum from patients.

A pair of anti-obinutuzumab antibodies can be used to develop a pharmacokinetic (PK) bridging assay to measure free drug; clone AbD51167ad is recommended as a capture antibody, paired with Human Anti-Obinutuzumab Antibody, clone AbD51296 (TZA049) as the detection antibody.

TZA048 a monovalent Fab antibody incorporating a SpyTag at the C-terminus end of the antibody heavy chain for conversion by the end user into alternative formats using any of the SpyCatchers available in our catalog.

Obinutuzumab (trade name Gazyvaro) is a humanized monoclonal antibody of the IgG1/kappa isotype that specifically targets the extracellular loop of CD20 when expressed at the surface of non malignant and malignant pre-B and mature B-cells. It does not bind CD20 expressed on hematopoietic stem cells, pro-B cells, normal plasma cells or other normal tissue. In non-clinical studies, obinutuzumab induces direct cell death and mediates antibody dependent cellular cytotoxicity (ADCC) and antibody dependent cellular phagocytosis (ADCP) through recruitment of Fc $\gamma$ RIII positive immune effector cells. In vivo, obinutuzumab mediates a low degree of complement dependent cytotoxicity (CDC). Obinutuzumab is indicated for the combination treatment of patients with chronic lymphocytic leukemia and follicular lymphoma.

View a summary of all anti-obinutuzumab antibodies.

#### **Affinity**

The monovalent intrinsic affinity of Human anti-Obinutuzumab Antibody, clone AbD51167ad was measured as  $K_D$ < = 0.096 nM by real time, label-free molecular interaction analysis on immobilized obinutuzumab.

#### **ELISA**

Clone AbD51167ad may be used as the capture antibody together with AbD51296ad (<u>TZA049</u>) or AbD51296pap (<u>TZA049P</u>) as the detection reagent for obinutuzumab in a PK bridging ELISA.

Protocol: PK bridging ELISA

### Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

## Guarantee

12 months from date of despatch

Acknowledgements	This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See bio-rad.com/en-us/trademarks for details.
