

Datasheet: TZA061P

Description:	HUMAN ANTI ROMOSOZUMAB:HRP
Specificity:	ROMOSOZUMAB
Other names:	Evenity
Format:	HRP
Product Type:	Monoclonal Antibody
Clone:	AbD60146
Isotype:	Fab antibody
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form

A bivalent human recombinant Fab (kappa light chain) generated by coupling of the monovalent SpyTagged Fab [TZA061](#) with a HRP conjugated BiSpyCatcher version 2. The coupled antibody has two DYKDDDDK tags and three His6-tags. It contains SpyTag3 peptide ([BLP086](#)) in 5-fold molar excess to block any unreacted Catcher sites. This antibody is supplied as a liquid.

Preparation

Metal chelate affinity chromatography

Source

E.coli

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.0095% MIT

Approx. Protein Concentrations

Antibody concentration 0.5 mg/ml

ImmunogenRomosozumab

Specificity

Human Anti-Romosozumab Antibody, clone AbD60146 is a paratope specific, inhibitory, anti-idiotypic antibody (Type 1) that specifically recognizes the free human monoclonal antibody drug romosozumab, and its biosimilar products. It does not recognize the drug target, sclerostin, nor romosozumab in complex with sclerostin. This antibody can be used to measure free romosozumab levels in serum from patients.

Clone AbD60146 is available as a monovalent Fab antibody incorporating a SpyTag at the C-terminus end of the antibody heavy chain for conversion by the end user into alternative formats using any of the [SpyCatchers](#) available in our catalog under product code [TZA061](#). It is also available as a bivalent Fab antibody already conjugated to HRP via coupling to the HRP conjugated BiSpyCatcher2 ([TZC002P](#)) for use in direct ELISA under product code [TZA061P](#).

A pair of anti-romosozumab antibodies can be used to develop a pharmacokinetic (PK) bridging assay to measure free drug; clone AbD60146 is recommended as a detection antibody, paired with Human Anti-Romosozumab Antibody, clone AbD60141ad ([TZA060](#)) as the capture reagent.

Romosozumab (trade name Evenity) is a humanized monoclonal antibody of the IgG2/kappa isotype that binds to sclerostin and prevents inhibition of the Wnt signaling pathway, thereby promoting osteogenesis and, to a lesser extent, reducing bone resorption. Romosozumab's inhibition of sclerostin also inhibits the increase in RANKL-dependent increases in osteoclast activity and bone resorption. Romosozumab is indicated for the treatment of osteoporosis in postmenopausal women at high risk for fracture.

Affinity

The monovalent intrinsic affinity of AbD60146pap was measured as $K_D = 0.4$ nM by real time, label free molecular interaction analysis on immobilized romosozumab.

ELISA

Clone AbD60146pap can be used in direct ELISA to detect romosozumab. It can also be used as a detection antibody to develop a pharmacokinetic (PK) bridging ELISA for romosozumab together with [TZA060](#) as the capture reagent.

Protocol: [PK bridging ELISA](#)

Storage

This product is shipped frozen.

When ready to use, thaw and aliquot the sample as needed. Store aliquots at -70°C , if available, otherwise store at -20°C . It is not recommended to keep aliquots at 4°C for more than one week.

Guarantee

12 months from date of despatch

Acknowledgements

This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See

bio-rad.com/en-us/trademarks for details.
