

Datasheet: TZA088GA

BATCH NUMBER 64744248

Description:	MOUSE ANTI HUMAN CD192
Specificity:	CD192
Other names:	CCR2
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	rB2C2-01/1H4
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified recombinant IgG containing a SpyTag at the C-terminus of the antibody heavy chain – liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Source	CHO cells
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein	IgG concentration 1.0 mg/ml

Concentrations

Immunogen	Mammalian cells transfected with full length CD192
------------------	--

Specificity

Mouse anti Human CD192 antibody, clone rB2C2-01/1H4, is a recombinant monoclonal antibody that recognizes CD192, also known as C-C motif chemokine receptor 2 (CCR2).

CD192 is a 42 kD transmembrane glycoprotein and member of the G-protein coupled receptor 1 family, which acts as a receptor for the chemokines MCP-1 (monocyte chemoattractant protein 1), MCP-3 and MCP-4. It is mainly expressed on monocytes and macrophages, with lower expression on basophils. Interaction between CD192 and MCP-1 initiates diverse chemotactic responses, particularly in monocytes through an increase in intracellular calcium levels.

MCP-1 is involved in the infiltration of monocytes in inflammatory diseases such as rheumatoid arthritis, as well as inflammatory responses against tumors. CD192 acts as a co-receptor with CD4 for HIV1 infection, and variations in CD192 are associated with relative resistance to HIV1.

Flow Cytometry

Use 5µl of the suggested working dilution to label 0.5x10⁶ cells in 100µl. Best practices suggest a 5 min centrifugation at 6,000g prior to sample application.

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee

12 months from date of despatch

Acknowledgements

This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See bio-rad.com/en-us/trademarks for details.
