

Datasheet: TZA089GA

Description:	MOUSE ANTI HUMAN CD185
Specificity:	CD185
Other names:	CXCR5
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	rB1-10/4F11-35
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified recombinant IgG containing a SpyTag at the C-terminus of the antibody heavy chain – liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Source	CHO cells
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml

Immunogen	Mammalian cells transfected with full length human CD185
External Database Links	<p>UniProt: P32302 Related reagents</p> <p>Entrez Gene: 643 CXCR5 Related reagents</p>
Synonyms	BLR1, MDR15
Specificity	<p>Mouse anti Human CD185 antibody, clone rB1-10/4F11-35, is a recombinant monoclonal antibody that recognizes CD185, also known as CXCR5.</p> <p>CD185 is a seven transmembrane GPCR belonging to the CXC chemokine receptor family. It is highly expressed in mature circulating B cells, Burkitt lymphoma cells, subpopulations of CD4+ T cells and skin-derived migratory dendritic cells. CD185 binds to B-lymphocyte chemoattractant (CXCR13), leading to multiple cellular events including cell migration, survival, proliferation and modulation of gene expression. CD185 is involved in B-cell migration into B-cell follicles of the spleen and Peyer patches. It is up-regulated on effector and memory T cells after TCR stimulation, whereas IL-2 causes down-regulation. CD185 expression by Tfh cells guides their migration toward B cell follicles.</p> <p>It has been reported that CD185 can be used as a marker to discriminate between different B cell subsets.</p>
Flow Cytometry	Use 5µl of the suggested working dilution to label 0.5x10 ⁶ cells in 100µl. Best practices suggest a 5 min centrifugation at 6,000g prior to sample application.
Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
Guarantee	12 months from date of despatch
Acknowledgements	This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See bio-rad.com/en-us/trademarks for details.
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/TZA089GA
