# Datasheet: TZC001B BATCH NUMBER 163735

| Description:  | SpyCatcher2:Biotin  |
|---------------|---------------------|
| Name:         | SPYCATCHER2         |
| Format:       | Catcher-Biotin      |
| Product Type: | Recombinant Protein |
| Quantity:     | 1 mg                |

## **Product Details**

| Applications                      | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . |                             |                           |  |   |  |  |  |
|-----------------------------------|--|-----------------------------|---------------------------|--|---|--|--|--|
|                                   | Immunoassay  | Yes                         | No                        | Not Determined                               | Suggested Dilution                          |  |  |  |
|                                   | Where this product has n   | ot been te                  | ested for u               | use in a particular tech                     | nique this does not                         |  |  |  |
|                                   | necessarily exclude its use in such procedures. Suggested working dilutions are given as<br>a guide only. It is recommended that the user titrates the product for use in their own<br>system using appropriate negative/positive controls.  |                             |                           |  |   |  |  |  |
| Target Species                    | Protein/peptide tag  |                             |                           |  |   |  |  |  |
| Product Form                      | Purified recombinant protein conjugated to Biotin - liquid   |                             |                           |  |   |  |  |  |

| Preservative<br>Stabilisers       | 0.0095% MIT  |                             |                           |  |   |  |  |  |
| Approx. Protein<br>Concentrations | 250 µM (3.9 mg/ml)   |                             |                           |  |   |  |  |  |
| Product Information               | <b>SpyCatcher2</b> (H-SpyC2)<br>bond with a second prote<br>mixing, is rapid, irreversit<br>contains a His6-tag at the   | ein that inc<br>ole, high-y | cludes a S<br>vielding ar | SpyTag. The reaction ond shows good specific | ccurs spontaneously on<br>city. SpyCatcher2 |  |  |  |

mutation was introduced (Hentrich et al. 2020).

The reaction is robust at pH 5 to 8, at temperatures from  $+4^{\circ}$ C to  $+37^{\circ}$ C, in various buffer conditions (Ca2<sup>+</sup>/Mg2<sup>+</sup> not needed) and in the presence of detergents. The reaction also occurs inside cells (*in vivo*). Since the speed of the coupling reaction is concentration dependent, it is recommended to use SpyCatcher2 undiluted.

All the different formats of SpyCatcher2 are compatible with Bio-Rad's recombinant HuCAL® antibodies with a SpyTag2 at the C-terminus of the heavy chain.

### Download SpyCatcher coupling protocol

SpyCatcher2 (TZC001) is available conjugated to biotin (TZC001B). It is also available as a modified version, SpyCatcher2-CYS (TZC001CYS), which contains a cysteine residue for site-specific conjugation by the user.

SpyCatcher2-CYS can dimerize during storage by formation of a disulfide bond via the free cysteines. Before conjugation to these cysteines, the SpyCatcher2-CYS dimers should be mildly reduced e.g., by addition of 5mM DTT and incubation for 1 hr at room temperature, followed by a fast DTT removal step, e.g., by size exclusion chromatography using PD-10 desalting columns, as DTT can interfere with the subsequent conjugation chemistry. Dialysis is not recommended for DTT removal, as the cysteines can oxidize again during this slow process.
