

## Datasheet: TZC002CYS

**BATCH NUMBER 168163**

<b>Description:</b>	BiSpyCatcher2-CYS
<b>Name:</b>	BISPYCATCHER2
<b>Format:</b>	Catcher-CYS
<b>Product Type:</b>	Recombinant Protein
<b>Quantity:</b>	1 mg

### Product Details

#### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Immunoassay	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Protein/peptide tag
<b>Product Form</b>	BiSpyCatcher2 purified recombinant protein, with one engineered cysteine residue; use for site-specific conjugation to a label of choice - liquid
<b>Preparation</b>	Recombinant protein expressed in <i>E. coli</i> and purified by affinity chromatography
<b>Source</b>	<i>E.coli</i>
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative</b>	0.0095% MIT
<b>Stabilisers</b>	5 mM EDTA
<b>Approx. Protein Concentrations</b>	239 $\mu$ M (7 mg/ml)
<b>Product Information</b>	<b>BiSpyCatcher2</b> (H-BiSpyC2) is a 29 kDa homodimer of SpyCatcher2 ( <a href="#">TZC001</a> ) bridged with a flexible linker. Each SpyCatcher2 subunit can form a stable covalent isopeptide bond with a second protein that includes a SpyTag. The reaction occurs spontaneously on

mixing, is rapid, irreversible, high-yielding and shows good specificity. BiSpyCatcher2 contains a His6-tag at the N-terminus. To avoid deamidation of asparagine, a N105D mutation was introduced ([Hentrich \*et al.\* 2020](#)) for each of the two Catchers.

The reaction is robust at pH 5 to 8, at temperatures from +4°C to +37°C, in various buffer conditions (Ca<sup>2+</sup>/Mg<sup>2+</sup> not needed) and in the presence of detergents. The reaction also occurs inside cells (*in vivo*). Since the speed of the coupling reaction is concentration dependent, it is recommended to use BiSpyCatcher2 undiluted.

All the different formats of BiSpyCatcher2 are compatible with Bio-Rad's recombinant HuCAL® antibodies with a SpyTag2 at the C-terminus of the heavy chain.

[Download BiSpyCatcher coupling protocol](#)

BiSpyCatcher2 ([TZC002](#)) is available in two modified versions, BiSpyCatcher2-CYS ([TZC002CYS](#)) and BiSpyCatcher-CYS3 ([TZC002CYS3](#)), which contain one or three cysteine residues, respectively, for site-specific conjugation by the user.

BiSpyCatcher2 ([TZC002](#)) is also available conjugated to biotin ([TZC002B](#)) and HRP ([TZC002P](#)).

BiSpyCatcher2-CYS can dimerize by formation of a disulfide bond via the free cysteines. Before conjugation to these cysteines, the BiSpyCatcher2-CYS must be reduced e.g., by addition of 5mM DTT and incubation for 1 hr at room temperature, followed by a fast DTT removal step, e.g., by size exclusion chromatography, as DTT can interfere with the conjugation chemistry.

BiSpyCatcher2-CYS3 contains DTT to avoid oligomerization through disulfide bond formation. Immediately before conjugation, to avoid oxidation and disulfide bond formation, carry out a fast DTT removal step, e.g., by size exclusion chromatography.

**Storage**

Store at -20°C only.  
Storage in frost-free freezers is not recommended.  
This product should be stored undiluted. Avoid repeated freezing and thawing as this may

denature the protein. Should this product contain a precipitate we recommend microcentrifugation before use.
