

Datasheet: VMA00008

**BATCH NUMBER 080714**

<b>Description:</b>	HUMAN ANTI VIMENTIN
<b>Specificity:</b>	VIMENTIN
<b>Other names:</b>	VIM
<b>Format:</b>	Purified
<b>Product Type:</b>	PrecisionAb Monoclonal
<b>Clone:</b>	AbD2701
<b>Isotype:</b>	HuCAL Fab bivalent
<b>Quantity:</b>	100 µl

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Frozen	▪			
Immunohistology - Paraffin (1)	▪			1/25 - 1/50
ELISA	▪			
Immunoprecipitation	▪			
Western Blotting	▪			1/1000

**The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range.** Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

**(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.**

### Target Species

Human

### Species Cross Reactivity

Reacts with: Mouse, Rat

**N.B.** Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

<b>Product Form</b>	A bivalent human recombinant Fab selected from the HuCAL <sup>®</sup> GOLD phage display library, expressed in <i>E. coli</i> . This Fab fragment is dimerized via a helix-turn-helix motif. The antibody is tagged with a myc-tag (EQKLISEEDL) and a his-tag (HHHHHH) at the C-terminus of the antibody heavy chain. This product is supplied as a liquid.
<b>Preparation</b>	Recombinant human monoclonal antibody purified by metal chelate affinity chromatography
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> )
<b>Approx. Protein Concentrations</b>	F(ab) concentration 0.5 mg/ml
<b>Immunogen</b>	Formalin fixed, paraffin-embedded human lymphoma tissue
<b>External Database Links</b>	<p><b>UniProt:</b>  <a href="#">P08670</a>    <a href="#">Related reagents</a></p> <p><b>Entrez Gene:</b>  <a href="#">7431</a>    VIM    <a href="#">Related reagents</a></p>
<b>Specificity</b>	<p><b>Human anti Human vimentin antibody</b> recognizes human vimentin, a class III intermediate filament of ~ 54kDa. Vimentin is preferentially expressed in mesenchymal tissues, and within the immune system is retained throughout T-cell development, with decreasing expression in B lymphocytes with maturation.</p> <p>In lymphatic tissues vimentin expression is seen in marginal zone areas, but not in follicle centers. A lack of vimentin expression in B cell lymphoma is indicative of follicular center origin.</p> <p>Human anti Human vimentin antibody recognizes vimentin as a band of ~54 kDa in a number of human cell line lysates by western blotting under reducing conditions.</p>
<b>Histology Positive Control Tissue</b>	Tonsil
<b>Western Blotting</b>	Anti vimentin antibody detects a band of approximately 54 kDa in HEK293 cell lysates.
<b>References</b>	1. Jarutat, T. <i>et al.</i> (2007) Selection of vimentin-specific antibodies from the HuCAL phage display library by subtractive panning on formalin-fixed, paraffin-embedded tissue. <a href="#">Biol Chem. 388 (6): 651-8.</a>
<b>Storage</b>	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
<b>Guarantee</b>	12 months from date of despatch
