

Datasheet: VMA00061

BATCH NUMBER 120115

Description:	MOUSE ANTI EGF RECEPTOR
Specificity:	EGF R
Other names:	ERBB, ERBB1, HER1
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG2a
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	■			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from ascites.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	<i>E. coli</i> derived recombinant protein corresponding to aa 363-499 of the human EGF receptor
External Database Links	UniProt:

ERBB1

Specificity

Mouse anti Human EGF receptor antibody recognizes the epidermal growth factor receptor, also known as Proto-oncogene c-ErbB-1 or receptor tyrosine-protein kinase erbB-1.

The protein encoded by EGFR is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGF receptor is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in EGFR are associated with lung cancer. Multiple alternatively spliced transcript variants that encode different protein isoforms have been found for EGFR. (provided by RefSeq, Jul 2010).

Mouse anti Human EGF receptor antibody detects a band of 170 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti EGF R detects a band of approximately 170 kDa in A431 cell lysates.

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee

12 months from date of despatch

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.

Health And Safety Information
