

Datasheet: VMA00079KT

Description:	SPECTRIN ALPHA CHAIN ANTIBODY WITH CONTROL LYSATE
Specificity:	SPECTRIN ALPHA CHAIN
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG2b
Quantity:	2 Westerns

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively [validated for the western blot application](#). The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	20µl Mouse monoclonal antibody purified by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	E. Coli derived recombinant protein, aa 1009-1209 of human spectrin alpha chain
External Database Links	UniProt: Q13813 Related reagents

Entrez Gene:[6709](#) SPTAN1 [Related reagents](#)

Synonyms	SPTA2
Specificity	<p>Mouse anti Human spectrin alpha chain antibody recognizes spectrin alpha chain also known as alpha-II spectrin, fodrin alpha chain spectrin and non-erythroid alpha subunit.</p> <p>Spectrins are a family of filamentous cytoskeletal proteins that function as essential scaffold proteins that stabilize the plasma membrane and organize intracellular organelles. Spectrins are composed of alpha and beta dimers that associate to form tetramers linked in a head-to-head arrangement. The spectrin alpha chain is specifically expressed in non-erythrocytic cells. The encoded protein has been implicated in other cellular functions including DNA repair and cell cycle regulation. Mutations in the spectrin alpha chain are the cause of early infantile epileptic encephalopathy-5. Alternate splicing results in multiple transcript variants (provided by RefSeq, Sep 2010).</p> <p>Mouse anti Human spectrin alpha chain antibody detects a band of 285 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
Western Blotting	Anti spectrin alpha chain detects a band of approximately 285 kDa in Jurkat cell lysates.
Instructions For Use	Please refer to the PrecisionAb western blotting protocol . For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400µg Jurkat lysate lyophilized in RIPA buffer.
Lysate Reconstitution	<p>- If using DDT reconstitute the lyophilized lysate with 190µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT.</p> <p>- If using BME reconstitute the lyophilized lysate with 180µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 20µl BME.</p> <p>Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.</p>
Storage	<p>Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.</p> <p>Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.</p>
Guarantee	As supplied, 12 months from date of despatch.
