**Specificity**

**Mouse anti Human exportin-1 antibody** recognizes exportin-1, also known as Exp1, XPO1 and chromosome region maintenance 1 protein homolog.

Exportin-1 mediates leucine-rich nuclear export signal (NES)-dependent protein transport and specifically inhibits the nuclear export of Rev and U snRNAs. It is involved in the control of several cellular processes by controlling the localization of cyclin B, MPAK, and MAPKAP kinase 2. This protein also regulates NFAT and AP-1 (provided by RefSeq, Jul 2008).

Mouse anti Human exportin-1 antibody detects a band of 112 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

**Western Blotting**

Anti exportin-1 detects a band of approximately 112 kDa in Jurkat cell lysates.

**Storage**

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
