

Datasheet: VMA00096KT

Description:	PLAKOPHILIN 1 ANTIBODY WITH CONTROL LYSATE
Specificity:	PLAKOPHILIN 1 aa235-726
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG1
Quantity:	2 Westerns

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively [validated for the western blot application](#). The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	20µl Mouse monoclonal antibody purified by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	Recombinant fusion protein fragment, consisting of amino acids 235-726 of human plakophilin 1, fused to maltose binding protein.
External Database Links	UniProt: Q13835 Related reagents

Entrez Gene:

[5317](#) PKP1 [Related reagents](#)

Specificity	<p>Mouse anti Human plakophilin 1 recognizes a member of the plakophilin family which have been identified as junctional proteins that are essential for the formation and stabilization of desmosomal cell contacts. Plakophilin 1 is a protein that in humans is encoded by the PKP1 gene, with a molecular weight of 75 kDa. This gene encodes a member of the arm-repeat (armadillo) and plakophilin gene families.</p> <p>Plakophilin proteins contain numerous armadillo repeats, localize to cell desmosomes and nuclei, and participate in linking cadherins to intermediate filaments in the cytoskeleton. This protein may be involved in molecular recruitment and stabilization during desmosome formation and in the formation of desmosomal plaques where it is associated with desmoplakin. It is not found in cell types that have non-epithelial desmosomes and is absent in fibroblasts and other connective tissue types, including sarcomas. Mutations in this gene have been associated with the ectodermal dysplasia/skin fragility syndrome.</p> <p>Mouse anti Human plakophilin 1 antibody has been found to be specific for the armadillo repeat domain of plakophilin 1. This antibody has been extensively validated for western blotting using whole cell lysates.</p>
Western Blotting	Anti plakophilin 1 antibody detects a band at 75 kDa in A431 cell lysates
Instructions For Use	Please refer to the PrecisionAb western blotting protocol . For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400µg A431 lysate lyophilized in RIPA buffer.
Lysate Reconstitution	<p>- If using DDT reconstitute the lyophilized lysate with 190µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT.</p> <p>- If using BME reconstitute the lyophilized lysate with 180µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 20µl BME.</p> <p>Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.</p>
Storage	<p>Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.</p> <p>Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.</p>
Guarantee	As supplied, 12 months from date of despatch.
