Datasheet: VMA00101

Description: MOUSE ANTI TROPONIN T (CARDIAC)

Specificity: TROPONIN T (CARDIAC)

Format: Purified

Product Type: PrecisionAb Monoclonal

Isotype: IgG2b

Quantity: 100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad’s ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species

Human

Product Form

Purified IgG - liquid

Preparation

Mouse monoclonal antibody purified by affinity chromatography on Protein G from tissue culture supernatant

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

Immunogen

Purified native Troponin T protein from human cardiac tissue.

Specificity

Mouse anti Human troponin T antibody recognizes troponin T, cardiac muscle, also known as cardiomyopathy dilated 1D (autosomal dominant) and cardiomyopathy hypertrophic 2.
Encoded by the TNNT2 gene, troponin T is the tropomyosin-binding subunit of the troponin complex, which is located on the thin filament of striated muscles and regulates muscle contraction in response to alterations in intracellular calcium ion concentration. Mutations in TNNT2 have been associated with familial hypertrophic cardiomyopathy as well as with dilated cardiomyopathy. Transcripts for TNNT2 undergo alternative splicing that results in many tissue-specific isoforms, however, the full-length nature of some of these variants has not yet been determined (provided by RefSeq, Jul 2008).

Mouse anti Human troponin T antibody detects a band of 40 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

**Western Blotting** Anti troponin T detects a band of approximately 40 kDa in human heart cell lysates.

**Storage** Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

**Guarantee** As supplied, 12 months from date of despatch.

**Acknowledgements** PrecisionAb is a trademark of Bio-Rad Laboratories.
