

Datasheet: VMA00121

Description:	MOUSE ANTI RUNX3
Specificity:	RUNX3
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG2b
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Rat N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody prepared by affinity chromatography on Protein G from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	Purified recombinant fragment of human RUNX3 (amino acids 186-252) expressed in <i>E. coli</i>
External Database Links	<p>UniProt: Q13761 Related reagents</p> <p>Entrez Gene: 864 RUNX3 Related reagents</p>
Synonyms	AML2, CBFA3, PEBP2A3

Specificity **Mouse anti Human RUNX3 antibody** recognizes RUNX3, also known as CBF-alpha-3, PEA2 alpha C, PEA2-alpha C, PEBP2 alpha C, PEBP2-alpha C, SL3-3 enhancer factor 1 alpha C subunit, SL3/AKV core-binding factor alpha C subunit, acute myeloid leukemia 2 protein, acute myeloid leukemia gene 2, core-binding factor subunit alpha-3, core-binding factor, runt domain, alpha subunit 3, oncogene AML-2, polyomavirus enhancer-binding protein 2 alpha C subunit and transcription factor AML2.

The RUNX3 gene encodes a member of the runt domain-containing family of transcription factors. A heterodimer of this protein and a beta subunit forms a complex that binds to the core DNA sequence 5'-PYGPYGGT-3' found in a number of enhancers and promoters, and can either activate or suppress transcription. It also interacts with other transcription factors. It functions as a tumor suppressor, and the gene is frequently deleted or transcriptionally silenced in cancer. Multiple transcript variants encoding different isoforms have been found for RUNX3 (provided by RefSeq, Jul 2008).

Mouse anti Human RUNX3 antibody detects a band of 45 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting Anti RUNX3 detects a band of approximately 45 kDa in Jurkat cell lysates.

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee 12 months from date of despatch
