

Datasheet: VMA00168

Description:	MOUSE ANTI RALB
Specificity:	RALB
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	OTI2C4
Isotype:	IgG1
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species

Human

Species Cross Reactivity

Reacts with: Mouse, Rat

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Preparation

Mouse monoclonal antibody purified by affinity chromatography from ascites.

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)
1% Bovine Serum Albumin

50% Glycerol

Immunogen Full length recombinant human RALB (NP_002872) produced in HEK293T cells

Specificity

Mouse anti Human RALB antibody, clone OTI2C4 recognizes RALB, also known as RAS-like protein B, ras related GTP binding protein B, ras-related protein Ral-B and v-ral simian leukemia viral oncogene homolog B (ras related; GTP binding protein).

Encoded by the RALB gene, this protein is a GTP-binding protein that belongs to the small GTPase superfamily and Ras family of proteins. GTP-binding proteins mediate the transmembrane signaling initiated by the occupancy of certain cell surface receptors (provided by RefSeq, Jul 2008).

Mouse anti Human RALB antibody, clone OTI2C4 detects a band of 23 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting Anti RALB detects a band of approximately 23 kDa in MCF7 cell lysates.

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee 12 months from date of despatch
