Specificity

Mouse anti Human GRAP2 antibody, clone OTI1G2 recognizes GRB2-related adapter protein 2 (GRAP2), also known as GRB-2-like protein, GRB2-related protein with insert domain, SH3-SH2-SH3 adapter Mona, SH3-SH2-SH3 adaptor molecule, adapter protein GRID, grf-40, grf40 adapter protein, growth factor receptor-binding protein, growth factor receptor-bound protein 2-related adaptor protein 2, hematopoietic cell-associated adapter protein GrpL and hematopoietic cell-associated adaptor protein GRPL.

Encoded by the GRAP2 gene and a member of the GRB2/Sem5/Drk family, GRB2-related adapter protein 2 is an adaptor-like protein involved in leukocyte-specific protein-tyrosine kinase signaling. Like its related family member, GRB2-related adaptor protein (GRAP), this protein contains an SH2 domain flanked by two SH3 domains. This protein interacts with other proteins, such as GRB2-associated binding protein 1 (GAB1) and the SLP-76 leukocyte protein (LCP2), through its SH3 domains. Transcript variants utilizing alternative polyA sites exist (provided by RefSeq, Jul 2008).

Mouse anti Human GRAP2 antibody, clone OTI1G2 detects a band of 37 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti GRAP2 detects a band of approximately 37 kDa in Jurkat cell lysates.
