

Datasheet: VMA00187

BATCH NUMBER 240615

Description:	MOUSE ANTI IRF6
Specificity:	IRF6
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	OTI2C10
Isotype:	IgG1
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography from ascites.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin 50% Glycerol
Approx. Protein Concentrations	IgG concentration 0.5 mg/ml

Immunogen Full length recombinant human IRF6 (NP_006138) produced in HEK293T cells

Specificity

Mouse anti Human IRF6 antibody, clone OTI2C10 recognizes interferon regulatory factor 6 (IRF6).

Encoded by the IRF6 gene, interferon regulatory factor 6 is member of the interferon regulatory transcription factor (IRF) family. Family members share a highly-conserved N-terminal helix-turn-helix DNA-binding domain and a less conserved C-terminal protein-binding domain. IRF6 may be a transcriptional activator. Mutations in the IRF6 gene can cause van der Woude syndrome and popliteal pterygium syndrome. Mutations in IRF6 are also associated with non-syndromic orofacial cleft type 6. Alternate splicing results in multiple transcript variants (provided by RefSeq, May 2011).

Mouse anti Human IRF6 antibody, clone OTI2C10 detects a band of 58 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti IRF6 detects a band of approximately 58 kDa in HEK293 cell lysates.

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee

12 months from date of despatch

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.
