

Datasheet: VMA00188

Description:	MOUSE ANTI ATP5C1
Specificity:	ATP5C1
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	OTI2H6
Isotype:	IgG1
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunoprecipitation	▪			
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography from ascites.
Buffer Solution	Phosphate buffered saline.
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin 50% Glycerol
Approx. Protein Concentrations	IgG concentration 0.5 mg/ml
Immunogen	Full length recombinant human ATP5C1 (NP_001001973) produced in <i>E. coli</i>

Synonyms

ATP5C, ATP5CL1

Specificity

Mouse anti Human ATP5C1 antibody, clone OTI2H6 recognizes the ATP5C1, also known as ATP synthase gamma chain, mitochondrial, ATP synthase subunit gamma, mitochondrial, F-ATPase gamma subunit, mitochondrial ATP synthase and gamma subunit 1.

Encoded by the ATP5C1 gene, this protein a subunit of mitochondrial ATP synthase. Mitochondrial ATP synthase catalyzes ATP synthesis, utilizing an electrochemical gradient of protons across the inner membrane during oxidative phosphorylation. ATP synthase is composed of two linked multi-subunit complexes: the soluble catalytic core, F1, and the membrane-spanning component, Fo, comprising the proton channel. The catalytic portion of mitochondrial ATP synthase consists of 5 different subunits (alpha, beta, gamma, delta, and epsilon) assembled with a stoichiometry of 3 alpha, 3 beta, and a single representative of the other 3. The proton channel consists of three main subunits (a, b, c). ATP5C1 encodes the gamma subunit of the catalytic core. Alternatively spliced transcript variants encoding different isoforms have been identified. ATP5C1 also has a pseudogene on chromosome 14 (provided by RefSeq, Jul 2008).

Mouse anti Human ATP5C1 antibody, clone OTI2H6 detects a band of 30 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti ATP5C1 detects a band of approximately 30 kDa in HeLa cell lysates.

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee

12 months from date of despatch.

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.
