

Datasheet: VMA00223

Description:	MOUSE ANTI RING1
Specificity:	RING1
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	8C12F4
lsotype:	lgG1
Quantity:	100 µl

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .							
		Yes	No	Not Determined	Suggested Dilution

Target Species	Human							
Species Cross Reactivity	Reacts with: Mouse, Rat N.B. Antibody reactivity reactivity is derived from personal communication further information.	and workir testing wi	thin our la	aboratories, peer-revie	wed publications or			
Product Form	Purified IgG - liquid							
Preparation	Mouse monoclonal antib ascites.	ody prepa	red by af	finity chromatography	on Protein G from			
Buffer Solution	Phosphate buffered salir	ne.						
Preservative Stabilisers	0.09% Sodium Azide (Na	aN ₃).						

Approx. Protein Concentrations	IgG concentration 0.5 mg/ml					
Immunogen	Recombinant protein corresponding to amino acids 79-263 of human RING1 expressed in <i>E. coli</i>					
External Database Links	UniProt: <u>Q06587</u> <u>Related reagents</u>					
	Entrez Gene: 6015 RING1 <u>Related reagents</u>					
Synonyms	RNF1					
Specificity	Mouse anti Human RING1 antibody recognizes the E3 ubiquitin-protein ligase RING1, also known as E3 ubiquitin-protein ligase RING1, polycomb complex protein RING1 and really interesting new gene 1 protein.					
	RING1 belongs to the RING finger family, members of which encode proteins characterized by a RING domain, a zinc-binding motif related to the zinc finger domain. The gene product can bind DNA and can act as a transcriptional repressor. It is associated with the multimeric polycomb group protein complex. The gene product interacts with the polycomb group proteins BMI1, EDR1, and CBX4, and colocalizes with these proteins in large nuclear domains. It interacts with the CBX4 protein via its glycine-rich C-terminal domain. The gene maps to the HLA class II region, where it is contiguous with the RING finger genes FABGL and HKE4 (provided by RefSeq, Jul 2008).					
	Mouse anti Human RING1 antibody detects a band of 54 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.					
Western Blotting	Anti RING1 detects a band of approximately 54 kDa in Jurkat cell lysates.					
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.					
Guarantee	12 months from date of despatch.					
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.					
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VMA00223 Antibody (10040)					
Regulatory	For research purposes only.
