

Datasheet: VMA00248

Description:	MOUSE ANTI GLUCOSE-6-PHOSPHATE DEHYDROGENASE
Specificity:	GLUCOSE-6-PHOSPHATE DEHYDROGENASE
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG1
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody prepared by affinity chromatography on Protein G from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	Purified recombinant fragment of human glucose-6-phosphate dehydrogenase expressed in <i>E. coli</i>
External Database Links	<p>UniProt: P11413 Related reagents</p> <p>Entrez Gene: 2539 G6PD Related reagents</p>

Specificity **Mouse anti Human glucose-6-phosphate dehydrogenase antibody** recognizes the glucose-6-phosphate 1-dehydrogenase, also known as glucose-6-phosphate 1-dehydrogenase.

This protein, encoded by the G6PD gene is a cytosolic enzyme encoded by a housekeeping

X-linked gene whose main function is to produce NADPH, a key electron donor in the defense against oxidizing agents and in reductive biosynthetic reactions. G6PD is remarkable for its genetic diversity. Many variants of G6PD, mostly produced from missense mutations, have been described with wide ranging levels of enzyme activity and associated clinical symptoms. G6PD deficiency may cause neonatal jaundice, acute hemolysis, or severe chronic non-spherocytic hemolytic anemia. Two transcript variants encoding different isoforms have been found for G6PD (provided by RefSeq, Jul 2008).

Mouse anti Human glucose-6-phosphate 1-dehydrogenase antibody detects a band of 59 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting	Anti glucose-6-phosphate dehydrogenase detects a band of approximately 59 kDa in HeLa cell lysates
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
Guarantee	12 months from date of despatch
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: Antibody (10040): https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
Regulatory	For research purposes only
