

Datasheet: VMA00260

Description:	MOUSE ANTI hnRNP M
Specificity:	hnRNP M
Format:	Purified
Product Type:	PrecisionAb™ Monoclonal
Clone:	OT13F3
Isotype:	IgG2b
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively [validated for the western blot application](#). The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography from ascites
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide (NaN ₃)
Stabilisers	1% Bovine Serum Albumin 50% Glycerol
Immunogen	Recombinant protein corresponding to amino acids 1-261 of human hnRNP M (NP_112480) produced in <i>E. coli</i>
External Database Links	UniProt: P52272 Related reagents Entrez Gene: 4670 HNRNPM Related reagents
Synonyms	HNRPM, NAGR1

Specificity **Mouse anti Human hnRNP M antibody** recognizes heterogeneous nuclear ribonucleoprotein M (hnRNP M), also known as CEA receptor, N-acetylglucosamine receptor 1, heterogenous nuclear ribonucleoprotein M4 and hnRNA-binding protein M4.

Encoded by the HNRNPM gene, hnRNP M belongs to the subfamily of ubiquitously expressed heterogeneous nuclear ribonucleoproteins (hnRNPs). The hnRNPs are RNA binding proteins and they complex with heterogeneous nuclear RNA (hnRNA). These proteins are associated with pre-mRNAs in the nucleus and appear to influence pre-mRNA processing and other aspects of mRNA metabolism and transport. While all of the hnRNPs are present in the nucleus, some seem to shuttle between the nucleus and the cytoplasm. The hnRNP proteins have distinct nucleic acid binding properties. Heterogeneous nuclear ribonucleoprotein M has three repeats of quasi-RRM domains that bind to RNAs. This protein also constitutes a monomer of the N-acetylglucosamine-specific receptor which is postulated to trigger selective recycling of immature GlcNAc-bearing thyroglobulin molecules. Alternative splicing results in multiple transcript variants (provided by RefSeq, Aug 2011).

Mouse anti Human hnRNP M antibody detects a band of 77 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting Anti hnRNP M detects a band of approximately 77 kDa in MOLT-4 cell lysates

Instructions For Use Please refer to the [PrecisionAb western blotting protocol](#). For additional information on secondary antibody dilution and exposure time see product web page.

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee As supplied, 12 months from date of despatch.

Acknowledgements PrecisionAb™ is a trademark of Bio-Rad Laboratories.
