

Datasheet: VMA00341

Description:	MOUSE ANTI CATENIN BETA
Specificity:	CATENIN BETA
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	AB05/1D4
Isotype:	IgG2b
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000
Immunofluorescence	▪			

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Learn about [how we validate our PrecisionAb range](#). Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid.
Preparation	Mouse monoclonal antibody prepared by affinity chromatography on Protein G from tissue culture supernatant.
Buffer Solution	Phosphate buffered saline.
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃).
Approx. Protein Concentrations	IgG concentration 0.5 mg/ml.
Immunogen	Recombinant protein corresponding to amino acids 682-781 of human catenin beta expressed in <i>E. coli</i>

External Database Links	UniProt: P35222 Related reagents
	Entrez Gene: 1499 CTNNB1 Related reagents
Synonyms	CTNNB
Specificity	<p>Mouse anti Human catenin beta antibody recognizes catenin beta, also known as catenin beta-1 or beta-catenin.</p> <p>Encoded by CTNNB1 gene, catenin beta is part of a complex of proteins that constitute adherens junctions (AJs). AJs are necessary for the creation and maintenance of epithelial cell layers by regulating cell growth and adhesion between cells. The encoded protein also anchors the actin cytoskeleton and may be responsible for transmitting the contact inhibition signal that causes cells to stop dividing once the epithelial sheet is complete. Finally, this protein binds to the product of the APC gene, which is mutated in adenomatous polyposis of the colon. Mutations in CTNNB1 are a cause of colorectal cancer (CRC), pilomatixoma (PTR), medulloblastoma (MDB), and ovarian cancer. Three transcript variants encoding the same protein have been found for CTNNB1 (provided by RefSeq, Oct 2009).</p> <p>Mouse anti Human beta catenin antibody detects a band of 92 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
Western Blotting	Anti catenin beta detects a band of approximately 92 kDa in LNCaP cell lysates.
Storage	This product is shipped at ambient temperature. Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
Guarantee	12 months from date of despatch.
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VMA00341
Regulatory	For research purposes only.
