<b>Specificity</b>	<p><b>Mouse anti estrogen sulfotransferase antibody</b> detects estrogen sulfotransferase, also known as sulfotransferase 1E1, EST-1 and sulfotransferase, estrogen-preferring. Encoded by the SULT1E1 gene, the estrogen sulfotransferase enzyme is a member of a family that catalyzes sulfate conjugation of many hormones, neurotransmitters, drugs, and xenobiotic compounds. This enzyme transfers a sulfo moiety to and from estrone, which may control levels of estrogen receptors.</p> <p>Mouse anti human estrogen sulfotransferase antibody has been extensively validated for western blotting using whole cell lysates and detects a band of 35 kDa.</p>

---

<b>Western Blotting</b>	Anti estrogen sulfotransferase detects a band of approximately 35 kDa in HEK293 cell lysates

<b>Instructions For Use</b>	Please refer to the <a href="#">PrecisionAb western blotting protocol</a> . For additional information on secondary antibody dilution and exposure time see product web page.
