

Datasheet: VMA00390

BATCH NUMBER 160322

Description:	MOUSE ANTI PROGESTERONE RECEPTOR
Specificity:	PROGESTERONE RECEPTOR
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	UMAB137
Isotype:	IgG2a
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography from ascites
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide (NaN ₃)
Stabilisers	1% Bovine Serum Albumin 50% Glycerol
Immunogen	Recombinant protein fragment corresponding to aa 1-298 of human progesterone receptor (NP_000917) produced in <i>E.coli</i>

Synonyms

NR3C3

Specificity

Mouse anti Human progesterone receptor antibody, clone UMAB137 recognizes the progesterone receptor, also known as PGR and nuclear receptor subfamily 3 group C member 3.

Encoded by the PGR gene, the progesterone receptor is a member of the steroid receptor superfamily. This protein mediates the physiological effects of progesterone, which plays a central role in reproductive events associated with the establishment and maintenance of pregnancy. PGR uses two distinct promoters and translation start sites in the first exon to produce two isoforms, A and B. The two isoforms are identical except for the additional 165 amino acids found in the N-terminus of isoform B and mediate their own response genes and physiologic effects with little overlap (provided by RefSeq, Jan 2011).

Mouse anti Human progesterone receptor antibody detects bands of 90 and 118 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti progesterone receptor detects bands of approximately 90 and 118 kDa in MCF7 cell lysates

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee

12 months from date of despatch

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.
