

# Datasheet: VMA00393KT

| Description:  | RIP3 ANTIBODY WITH CONTROL LYSATE |
|---------------|-----------------------------------|
| Specificity:  | RIP3                              |
| Format:       | Purified                          |
| Product Type: | PrecisionAb™ Monoclonal           |
| Clone:        | 1D9                               |
| lsotype:      | lgG2b                             |
| Quantity:     | 2 Westerns                        |
|               |                                   |

## **Product Details**

| Applications               | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol  |            |    |                |                    |  |  |
|----------------------------|---|------------|----|----------------|--------------------|--|--|
|                            | recommendations, please visit www.bio-rad-antibodies.com/protocols.   |            |    |                |                    |  |  |
|                            |   | Yes        | No | Not Determined | Suggested Dilution |  |  |
|                            | Western Blotting  | •          |    |                | 1/1000             |  |  |
|                            | <b>PrecisionAb antibodies have been extensively</b> <u>validated for the western blot application</u> . Th antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type. |            |    |                |                    |  |  |
| Target Species             | Human   |            |    |                |                    |  |  |
| Product Form               | Purified IgG - liquid   |            |    |                |                    |  |  |
| Preparation                | 20µl Mouse monoclonal antibody purified by affinity chromatography from ascites   |            |    |                |                    |  |  |
| Buffer Solution            | Phosphate buffered saline   |            |    |                |                    |  |  |
| Preservative               | 0.09% Sodium Azide (NaN <sub>3</sub> )  |            |    |                |                    |  |  |
| Stabilisers                | 1% Bovine Serum Albumin   |            |    |                |                    |  |  |
|                            | 50% Glycerol  |            |    |                |                    |  |  |
| Immunogen                  | Recombinant protein fragment corresponding to aa 233-518 of human RIP3 (NP_006862) produced in <i>E.coli</i>  |            |    |                |                    |  |  |
| External Database<br>Links | UniProt:<br><u>Q9Y572</u> <u>Related rea</u>  | agents     |    |                |                    |  |  |
|                            | Entrez Gene:<br><u>11035</u> RIPK3 <u>Related</u>   | d reagents |    |                |                    |  |  |
| Synonyms                   | RIP3  |            |    |                |                    |  |  |

| Specificity                      | <b>Mouse anti Human RIP3 antibody</b> recognizes RIP3, also known as RIP-like protein kinase 3, receptor interacting protein 3 and receptor-interacting serine/threonine-protein kinase 3.   |  |  |  |  |
|----------------------------------|--|--|--|--|--|
|                                  | The product of the RIPK3 gene is a member of the receptor-interacting protein (RIP) family of serine/threonine protein kinases, and contains a C-terminal domain unique from other RIP family members. The RIP3 protein is predominantly localized to the cytoplasm, and can undergo nucleo-cytoplasmic shuttling dependent on novel nuclear localization and export signals. It is a component of the tumor necrosis factor (TNF) receptor-I signaling complex, and can induce apoptosis and weakly activate the NF-kappaB transcription factor (provided by RefSeq, Jul 2008). |  |  |  |  |
|                                  | Mouse anti Human RIP3 antibody detects a band of 57 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.  |  |  |  |  |
| Western Blotting                 | Anti RIP3 detects a band of approximately 57 kDa in Jurkat cell lysates  |  |  |  |  |
| Instructions For Use             | Please refer to the <u>PrecisionAb western blotting protocol.</u> For additional information on secondary antibody dilution and exposure time see product web page.  |  |  |  |  |
| Lysate Composition               | 400µg Jurkat lysate lyophilized in RIPA buffer   |  |  |  |  |
| Lysate Reconstitution            | <ul> <li>If using DDT reconstitute the lyophilized lysate with 190µl DI H<sub>2</sub>O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT.</li> <li>If using BME reconstitute the lyophilized lysate with 180µl DI H<sub>2</sub>O, add 200µl 2x Laemmli Sample Buffer and 20µl BME.</li> <li>Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.</li> </ul>  |  |  |  |  |
| Storage                          | Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.  |  |  |  |  |
|                                  | Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.   |  |  |  |  |
| Guarantee                        | As supplied, 12 months from date of despatch   |  |  |  |  |
