

Datasheet: VMA00441

Description:	MOUSE ANTI MMAB
Specificity:	MMAB
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	OTI5G1
Isotype:	IgG2a
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin 50% Glycerol
Immunogen	Full length recombinant human MMAB (NP_443077) produced in HEK293T cells
External Database Links	UniProt:

Entrez Gene:

[326625](#) MMAB [Related reagents](#)

Specificity **Mouse anti Human MMAB antibody** recognizes MMAB also known as ATP:cob(I)alamin adenosyltransferase, ATP:corrinoid adenosyltransferase, aquocob(I)alamin vitamin B12s adenosyltransferase, cilia and flagella associated protein 23, CFAP23 and methylmalonic aciduria type B protein.

The MMAB gene encodes a protein that catalyzes the final step in the conversion of vitamin B(12) into adenosylcobalamin (AdoCbl), a vitamin B12-containing coenzyme for methylmalonyl-CoA mutase. Mutations in the gene are the cause of vitamin B12-dependent methylmalonic aciduria linked to the cblB complementation group. Alternatively spliced transcript variants have been found (provided by RefSeq, Apr 2011).

Mouse anti MMAB antibody detects a band of 27 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting Anti MMAB detects a band of approximately 27 kDa in HEK293 cell lysates

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee 12 months from date of despatch
