

Datasheet: VMA00468

Description:	MOUSE ANTI CD79a
Specificity:	CD79a
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG1
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography on Protein G from tissue culture supernatant.
Buffer Solution	Phosphate buffered saline.
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃).
Immunogen	KLH conjugated synthetic peptide between amino acids 160-188 of human CD79a
External Database Links	<p>UniProt:</p> <p>P11912 Related reagents</p> <p>Entrez Gene:</p>

Synonyms	IGA, MB1
-----------------	----------

Specificity	<p>Mouse anti Human CD79a antibody recognizes the B-cell antigen receptor complex-associated protein alpha chain, also known as CD79a (immunoglobulin-associated alpha), MB-1 membrane glycoprotein, Ig-alpha, membrane-bound immunoglobulin-associated protein or surface IgM-associated protein.</p> <p>The B lymphocyte antigen receptor is a multimeric complex that includes the antigen-specific component, surface immunoglobulin (Ig). Surface Ig non-covalently associates with two other proteins, Ig-alpha and Ig-beta, which are necessary for expression and function of the B-cell antigen receptor. The CD79A gene encodes the Ig-alpha protein of the B-cell antigen component. Alternatively spliced transcript variants encoding different isoforms have been described (provided by RefSeq, Jul 2008).</p> <p>Mouse anti Human CD79a antibody detects a band of 45-55 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
--------------------	---

Western Blotting	Anti CD79a detects a band of approximately 45-55 kDa in Ramos cell lysate.
-------------------------	--

Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
----------------	---

Guarantee	12 months from date of despatch.
------------------	----------------------------------

Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
-------------------------	---

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VMA00468 Antibody (10040)
--------------------------------------	--

Regulatory	For research purposes only.
-------------------	-----------------------------
