Datasheet: VMA00550

**Description:** MOUSE ANTI KINESIN FAMILY MEMBER 2C

**Specificity:** KINESIN FAMILY MEMBER 2C

**Format:** Purified

**Product Type:** PrecisionAb™ Monoclonal

**Clone:** CPTC20

**Isotype:** IgG1

**Quantity:** 100 µl

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

*The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](http://www.bio-rad-antibodies.com) to learn how we validate our PrecisionAb range.*

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

### Target Species

Human

### Product Form

Purified IgG - liquid

### Preparation

Mouse monoclonal antibody purified by affinity chromatography on Protein G from tissue culture supernatant

### Buffer Solution

Phosphate buffered saline

### Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

### Immunogen

Recombinant protein of human kinesin family member 2C

### External Database Links

**UniProt:**

**Synonyms**

KNSL6
**Specificity**

Mouse anti Human kinesin family member 2C antibody recognizes the kinesin-like protein KIF2C, also known as kinesin-like protein 6 or mitotic centromere-associated kinesin.

The protein encoded by KIF2C gene is a member of kinesin-like protein family. Proteins of this family are microtubule-dependent molecular motors that transport organelles within cells and move chromosomes during cell division. This protein is important for anaphase chromosome segregation and may be required to coordinate the onset of sister centromere separation (provided by RefSeq, Jul 2008).

Mouse anti Human kinesin family member 2C antibody detects a band of 81 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

**Western Blotting**

Anti kinesin family member 2C detects a band of approximately 81 kDa in Jurkat cell lysates

**Storage**

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

**Guarantee**

As supplied, 12 months from date of despatch.
